The conference theme, The Pursuit of Definitive Healing - Conforming to the Divine Will in Healthcare, was chosen to enhance our faith and level of awareness that definitive healing is only provided by our Most Blessed and loving Lord God. As we strive to align our wills to His Divine Will, each of us receives healing and peace that the world cannot give. We are then entrusted to share this treasure with others. As instruments of the Lord, healthcare professionals have unique opportunities to provide healing encounters for the sick which may facilitate them to conform their lives to the Divine Will. The audience will include healthcare professionals as well as all others not involved in the medical disciplines.
